

C-PLUG Cast Iron Bridge Plug V3

The Eclipse Well Services C-PLUG Wireline Set / Drillable is a cast iron bridge plug designed to hold large pressure differentials at elevated temperatures. It is primarily used for plug and abandonment situations. When it is time for removal, the cast iron construction allows it to be removed with a milling operation.

Benefits/Capabilities:

- Electric wireline set
- Sets in any grade casing - including P-110
- Rated to 10,000 psi at 275°F V3 (350°F - VITON)
- Can be set on any wireline pressure setting tool
- Designed for extra high pressure and rapid drill-out
