

E-Pulse Pro Jetting Tool

Eclipse Well Services E- PULSE PRO Jetting tool creates pulsating pressure waves. These pressure waves remove debris build up and scale within tubulars, break up near wellbore damage as well as restore and enhance the permeability of the perforations and surrounding wellbore area. The internal chamber has been designed using computational fluid dynamics and has no moving parts. The short robust construction makes it ideal for jetting operations where BHA lengths are limited.

Benefits:

- Short and robust construction
- No moving parts
- Dynamic flow Jet
- Debris and sand clean out
- Tubular Jetting Operations
- Fishing Neck Clean out
- Correct placement of chemicals

E-Pulse Pro	1.688"	2.125"	2.875"
Length	14.75"	18.75"	18.75"
Connection	1" AMMT BOX	1-1/2" AMMT BOX	2-3/8" PAC BOX
Tensile Strength	45,400 lbs	84,700 lbs	158,900 lbs
Material	Inconel
