

E-POWER Setting Tool

Eclipse Well Services E-Power is a unique electro-mechanical downhole setting tool, capable of delivering up to 150,000 lbs of linear force which can be used to set, or un-set, plugs and packers in a wide range of tubing and casing sizes.

- Non-Explosive and non-lithium allows the E-Power to be deployed easily and efficiently without any permits.
- Simple design that allows the E-Power to be used as the main force generator for numerous applications
- Multitool platform that can be coupled with numerous attachments for Well Service interventions
- Does not need to be redressed and only a change of the PCM is required to re-run the tool in minutes
- Small and robust design that can be run on all conveyance methods, either in memory or real time (e-line) applications
